The Boma collection, designed by Rodolfo Dordoni for Kettal, was born from the need of high performances of outdoor environment, without sacrificing the increasing demand for comfort that new products have to face. Therefore the structure is organized around a frame entirely made of aluminum, capable of hiding in the essentiality of its lines either the quality of the used materials and the chance of easy articulation in different compositions.

The Boma collection, designed by Rodolfo Dordoni for Kettal, was born from the need of high performances of outdoor environment, without sacrificing the increasing demand for comfort that new products have to face. Therefore the structure is organized around a frame entirely made of aluminum, capable of hiding in the essentiality of its lines either the quality of the used materials and the chance of easy articulation in different compositions.

The Boma collection, designed by Rodolfo Dordoni for Kettal, was born from the need of high performances of outdoor environment, without sacrificing the increasing demand for comfort that new products have to face. Therefore the structure is organized around a frame entirely made of aluminum, capable of hiding in the essentiality of its lines either the quality of the used materials and the chance of easy articulation in different compositions.
